

Final Proposal

Atharv Gopaluni

Concept

I want to update my midterm, which was a website to showcase my media "company."

I have more projects I want to show, but moreover, I want to add more to it. Under the about me, there will be more about me, and a more comprehensive portfolio of my work outside of the "company."

My own personal website was currently made on a builder, and I want to rebuild it on full HTML/CSS/JS, while also adding new ideas. Additionally, perhaps I will add a light mode as well.

Inspiration

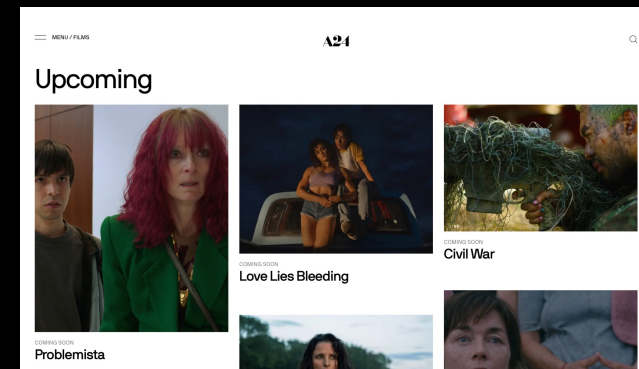

<https://a24films.com>

<https://www.atharvgopaluni.com>

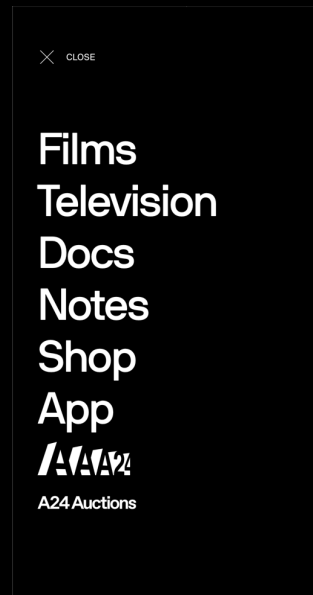

I want to further the connection between my website and A24's with more dramatic graphics and more pages and subpages.

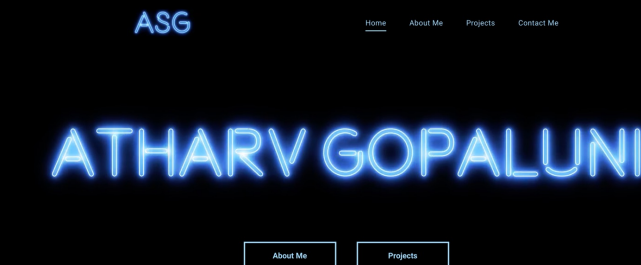

A24 home page

A24 films page

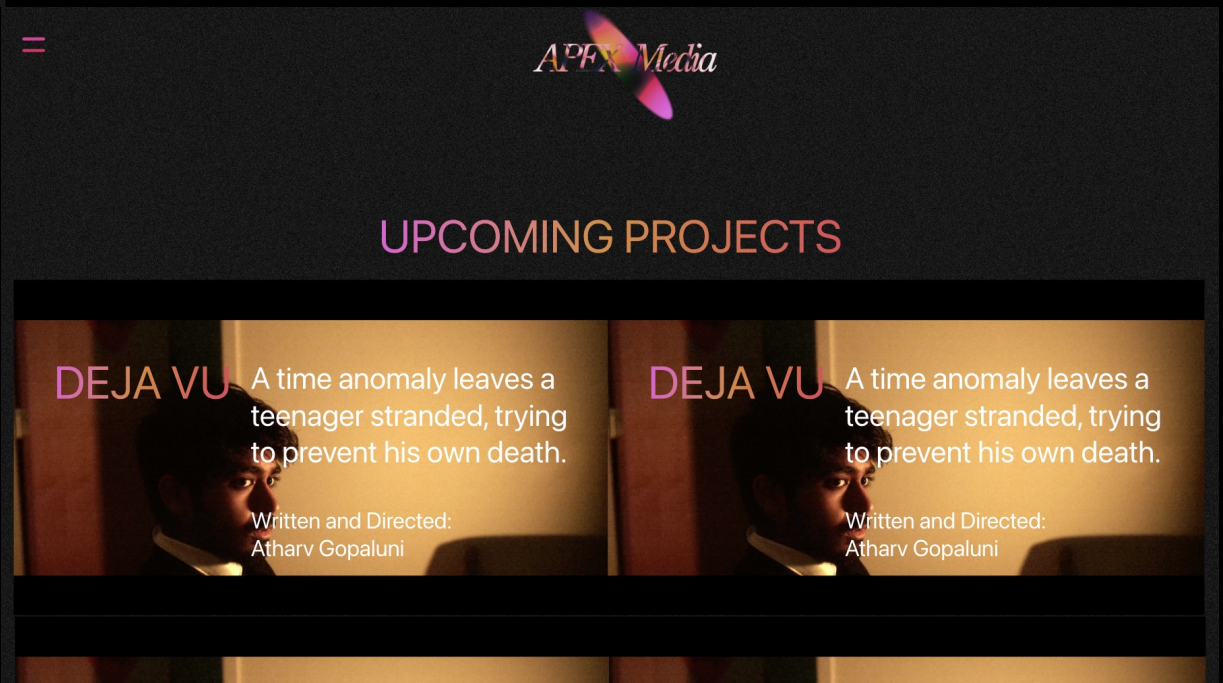

A24 menu nav bar

My current personal website

Schematics/Wireframing

NEW HTML/CSS/JS that I will utilize

- Dropdowns
- Text input (for search)
- Background styling (I want a more "film" feel)
- On-click fade information (more dramatic)
- Animations
- Overlaying pictures on top of one another
- Overlaying text on images
- More to come as I think of them
